This was absolutely the best, most worth-while course that I have taken at University. While the workload was intense, I got a lot from it in both respect to my education but also my life. Really helped me to take this, I wish it had been two semesters. After taking this I am ready to take almost any psych class @ UBC. Maybe simple comments but I have Nothing honestly nothing bad to say about this course.

This was one of the best courses I took in my life, mainly because the instructor, Adele Diamond, was so good. She really inspired me to work hard and I learned a lot out of the course.

I really enjoyed this course. Everything we read could always be applied to real life situations and you always helped us make those connections. The material I learned here, I'll carry with me into the future. It was challenging and very rewarding - would definitely recommend you to other people.

She is amazingly intelligent and a great inspiration to her students.

However the course was just too much pressure for students with a full course, a part time job and other activities. But as a teacher she is by far one of the best.

Thank you Adele!
