

## Adding a new task to Presentation

To install a task, save the task within the appropriate Presentation Tasks folder.  
For example:

My Documents\Colorado\Presentation Tasks\'name of appropriate folder'

Run task in Presentation

a) Start the task by clicking on the 'Experiment tab' in Presentation, and then clicking on 'Open Experiment'.

b) Then browse until you find the appropriate experiment file (\*.exp) and open .

For example:

My Documents\Colorado\Presentation Tasks\ DayNightTasks\DayNight.exp

c) Before you press Run, click on the 'Scenarios tab' to localize your log directory.

To do this, click on the top << button. This will change the log file path. Then,. return to the 'Experiment tab' and click on Save Experiment.
